

Manufactured Home Foundation Inspections

We certify that mobile homes are on a permanent foundation.

The foundation of a manufactured home must meet a certain criteria of structural stability and an Engineering Certification is required for all VA & FHA-insured loans.

The Engineer's Certification specifies that the foundation is in compliance with the HUD Permanent Guide for Manufactured Homes (PFGMH-HUD 7584).

We Can Provide Engineering Certificates for:

- ◆ New or Existing Foundations
- ◆ FHA/HUD Compliant Permanent Foundations
- ◆ VA Permanent Foundations
- ◆ Conventional Loan Permanent Foundations
- ◆ Modular Homes

Place orders securely over the Internet
3-5 day turnaround
Pay at closing option
Referrals available for retrofitting if
foundation is found non-compliant
